Value, comfort, and a better environment come standard with every ENERGY STAR® qualified home from Gregory Allen Enterprises, Inc.

OUR HOMES PROVIDE:

THE GOVERNMENT BACKED ENERGY STAR LABEL

Home buying is complex enough without having to know all the details of energy-efficient construction. Instead, look for the ENERGY STAR label to easily identify homes that are truly energy efficient.

LOWER UTILITY BILLS

Our ENERGY STAR qualified homes use substantially less energy—delivering \$200 to \$400 in annual savings. Over the average 7 to 8 years you may live in your home, this adds up to thousands of dollars saved on utility bills.

LOWER MAINTENANCE

Enjoy the peace of mind that comes with a low-maintenance home. Tight construction and long-lasting, efficient equipment make our homes more durable, helping to minimize many of the maintenance problems found in typical homes.

COMFORT AND QUIET

Properly installed energy efficiency features deliver better protection against cold, heat, drafts, moisture, pollution, and noise. Our ENERGY STAR qualified homes help to provide consistent temperatures, improved indoor air quality, and greater durability.

SMART INVESTMENT

More than 725,000 ENERGY STAR qualified homes have been built across the country. By the end of the decade, more than 2 million homes are expected to earn the ENERGY STAR. The trend is clear. By choosing a home that has earned the ENERGY STAR label, you can be confident that your home will have an increasingly valued feature when the time comes to sell.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
